

Lab Pack Services

Midwest Environmental Services, Inc provides Lab Pack Services. Our division offers segregation and packaging services for the proper disposal of unwanted, obsolete or unidentified laboratory chemicals for various types of generators. Whether you're a small manufacturer, hospital, or university, the problem of managing laboratory chemicals sometimes arise. Midwest Environmental Services offers effective, cost efficient solutions for your specific needs.

Our forty hour OSHA trained, qualified professionals and chemists identify, classify, isolate, and package the waste to meet DOT and EPA prerequisites. Upon packaging for removal, the proper documentation is completed to ensure that your business complies with all requirements.

Our full service approach guarantees that waste will be tracked and inventoried from the source at your facility all the way through transportation, treatment/recycling and final disposition. At Midwest Environmental Services, we minimize your risk and liability to solve your environmental issues, safely and conveniently.

Upon final destination, chemicals are managed and disposed, using the latest and best demonstrated available technology. Some of these methods include:

- Fuel Blending
- Neutralization
- Incineration
- Landfill

By using Midwest Environmental Services, Inc. for your lab pack needs, you can rest assured that your waste is properly managed and disposed. For additional information contact your sales representative or call our office at 800-388-5160.
